Inside of a Dog Alexandra Horowitz, 2009-09-15 The #1 New York Times bestselling book from the author of *The Year of the Puppy* that asks what dogs know and how they think. The answers will surprise and delight you as Alexandra Horowitz, a cognitive scientist, explains how dogs perceive their daily worlds, each other, and that other quirky animal, the human. Horowitz introduces the reader to dogs' perceptual and cognitive abilities and then draws a picture of what it might be like to be a dog. What's it like to be able to smell not just every bit of open food in the house but also to smell sadness in humans, or even the passage of time? How does a tiny dog manage to play successfully with a Great Dane? What is it like to hear the bodily vibrations of insects or the hum of a fluorescent light? Why must a person on a bicycle be chased? What's it like to use your mouth as a hand? In short, what is it like for a dog to experience life from two feet off the ground, amidst the smells of the sidewalk, gazing at our ankles or knees? *Inside of a Dog* explains these things and much more. The answers can be surprising—once we set aside our natural inclination to anthropomorphize dogs. *Inside of a Dog* also contains up-to-the-minute research—on dogs' detection of disease, the secrets of their tails, and their skill at reading our attention—that Horowitz puts into useful context. Although not a formal training guide, *Inside of a Dog* has practical application for dog lovers interested in understanding why their dogs do what they do. With a light touch and the weight of science behind her, Alexandra Horowitz examines the animal we think we know best but may actually understand the least. This book is as close as you can get to knowing about dogs without being a dog yourself.

Emergency Response to Chemical and Biological Agents John R. Cashman,2002-01-01 With the increasing availability of biological and chemical materials, the threat of terrorism grows daily. Innocent bystanders -the major targets of terrorists because they gain the most publicity - create a vast number of potential victims. In our changing world, horrendous violence has become commonplace. The growth of incidences involving chemical and biological agents has created a need for local response teams to be aware of the dangers they face. *Emergency Response to Chemical and Biological Agents* serves as a training manual for emergency responders who handle incidents involving biological and chemical hazardous materials. The author covers poisons such as nerve, blood, blister, and choking gases and biological agents such as anthrax, typhus, and cholera. Using examples ripped from the headlines, he explains what is and is not a terrorist act, and the difference in handling each incident. In addition the author explains the standard operating procedures of Hazardous Materials Teams before, during, and after an incident. Whether terrorist act or chemical spill, local responders usually reach the scene first. As these incidents multiply - and they will - these teams will need a blueprint for dealing with chemical and biological materials. *Emergency Response to Chemical and Biological Agents* provides a clear, concise plan of action for responding to these incidents.
