The Art of Asking Amanda Palmer,2014-11-11 Rock star, crowdfunding pioneer, and TED speaker Amanda Palmer knows all about asking. Performing as a living statue in a wedding dress, she wordlessly asked thousands of passersby for their dollars. When she became a singer, songwriter, and musician, she was not afraid to ask her audience to support her as she surfed the crowd (and slept on their couches while touring). And when she left her record label to strike out on her own, she asked her fans to support her in making an album, leading to the world's most successful music Kickstarter. Even while Amanda is both celebrated and attacked for her fearlessness in asking for help, she finds that there are important things she cannot ask for-as a musician, as a friend, and as a wife. She learns that she isn't alone in this, that so many people are afraid to ask for help, and it paralyzes their lives and relationships. In this groundbreaking book, she explores these barriers in her own life and in the lives of those around her, and discovers the emotional, philosophical, and practical aspects of The Art of Asking. Part manifesto, part revelation, this is the story of an artist struggling with the new rules of exchange in the twenty-first century, both on and off the Internet. The Art of Asking will inspire readers to rethink their own ideas about asking, giving, art, and love.

The Fight for Earth - Defenders of the Human Race and Galactic Heroes J. R. Fleshmen,2009-05-07 Our story starts on a cool February morning in the year of 2078 The night before some strange objects fell from the sky and landed in some part of Montana. A special operations team lead by Captain Williams is sent to investigate these strange objects. Their investigation will reveal that these strange objects are not just rocks from space. They in fact are space ships, and will be the biggest threat the world will have to ever face. From this great threat, eight unique humans are given super abilities by some new friendly life forms, that in fact may be able to help defeat this great threat. Will the newly formed Elite Eight with their super human abilities and the help from other friendly aliens, be able to save the Earth. We Will Have To See...

The Big Question Alister McGrath,2015-11-03 Richard Dawkins's groundbreaking book The God Delusion created an

explosion of interest in the relation of science and faith. This often troubled relationship between science and religion was seemingly damaged by the rise of the New Atheism, which insisted that science had essentially disproved not just God but also the value of religion. There is increasing skepticism towards its often glib and superficial answers; and the big questions about faith, God and science haven't gone away--in fact, we seem to talk about them more than ever. Alister McGrath's *The Big Question* is an accessible, engaging account of how science relates to faith, exploring how the working methods and assumptions of the natural sciences can be theologically useful. McGrath uses stories and analogies, as well as personal accounts, in order to help readers understand the scientific and theological points he makes, and grasp their deeper significance. An extremely accomplished scientist and scholar, McGrath criticizes the evangelism of the New Atheists and paves a logical well-argued road to the compatibility between science and faith. Some of his main discussion points include:

1. There is much more convergence between science and faith than is usually appreciated
2. How the three great models of scientific explanation can be adapted to religious belief
3. Belief in God provides a 'big picture' of reality, making sense of science's successes

Emergent Strategy adrienne maree brown, 2017-03-20 In the tradition of Octavia Butler, here is radical self-help, society-help, and planet-help to shape the futures we want. Change is constant. The world, our bodies, and our minds are in a constant state of flux. They are a stream of ever-mutating, emergent patterns. Rather than steel ourselves against such change, *Emergent Strategy* teaches us to map and assess the swirling structures and to read them as they happen, all the better to shape that which ultimately shapes us, personally and politically. A resolutely materialist spirituality based equally on science and science fiction: a wild feminist and afro-futurist ride! adrienne maree brown, co-editor of *Octavia's Brood: Science Fiction from Social Justice Movements*, is a social justice facilitator, healer, and doula living in Detroit.

Materialities of Care Christina Buse, Daryl Martin, Sarah Nettleton, 2018-06-22 *Materialities of Care* addresses the role of material culture within health and social care encounters, including everyday objects, dress, furniture and architecture. Makes visible the mundane and often unnoticed aspects of material culture and attends to interrelations between materials and care in practice Examines material practice across a range of clinical and non-clinical spaces including hospitals, hospices, care homes, museums, domestic spaces and community spaces such as shops and tenement stairwells Addresses fleeting moments of care, as well as choreographed routines that order bodies and materials Focuses on practice and relations between materials and care as ongoing, emergent and processual International contributions from leading scholars draw attention to methodological approaches for capturing the material and sensory aspects of health and social care encounters

You Are Your Best Thing Tarana Burke, Brené Brown, 2022-01-25 NEW YORK TIMES BESTSELLER • Tarana Burke and Dr. Brené Brown bring together a dynamic group of Black writers, organizers, artists, academics, and cultural figures to discuss the topics the two have dedicated their lives to understanding and teaching: vulnerability and shame resilience. Contributions by Kiese Laymon, Imani Perry, Laverne Cox, Jason Reynolds, Austin Channing Brown, and more NAMED ONE OF THE BEST BOOKS OF THE YEAR BY MARIE CLAIRE AND BOOKRIOT It started as a text between two friends. Tarana Burke, founder of the ‘me too.’ Movement, texted researcher and writer Brené Brown to see if she was free to jump on a call. Brené assumed that Tarana wanted to talk about wallpaper. They had been trading home decorating inspiration boards in their last text conversation so Brené started scrolling to find her latest Pinterest pictures when the phone rang. But it was immediately clear to Brené that the conversation wasn’t going to be about wallpaper. Tarana’s hello was serious and she hesitated for a bit before saying, “Brené, you know your work affected me so deeply, but as a Black woman, I’ve sometimes had to feel like I have to contort myself to fit into some of your words. The core of it rings so true for me, but the application has been harder.” Brené replied, “I’m so glad we’re talking about this. It makes sense to me. Especially in terms of vulnerability. How do you take the armor off in a country where you’re not physically or emotionally safe?” Long pause. “That’s why I’m calling,” said Tarana. “What do you think about working together on a book about the Black experience with vulnerability and shame resilience?” There was no hesitation. Burke and Brown are the perfect pair to usher in this stark, potent collection of essays on Black shame and healing. Along with the anthology contributors, they create a space to

recognize and process the trauma of white supremacy, a space to be vulnerable and affirm the fullness of Black love and Black life.

Vulnerable Raleigh Sadler,2019-02-01 There are more than 40 million enslaved people in the world today. This is overwhelming. A number so large leaves us asking, What could I even do to help? In his book *Vulnerable: Rethinking Human Trafficking*, Raleigh Sadler, president and founder of Let My People Go, makes the case that anyone can fight human trafficking by focusing on those who are most often targeted. This book invites the reader to understand their role in the problem of human trafficking, but more importantly, their role in the solution. Human trafficking can be defined as the exploitation of vulnerability for commercial gain. Using the power of story and candid interviews, Sadler seeks to discover how ordinary people can fight human trafficking by recognizing vulnerability and entering in. As vulnerable people, we can empower other vulnerable people, because Christ was made vulnerable for us.

How can we end wars and ensure that every person on the planet has enough to eat and a decent place to live? Through fables, personal anecdotes, conversations, emails and chat transcripts, Bansal shows us how often the way to create more charitable people is simply through talk. Part of Bansal's mission is to start a charity project to effect worldwide change, including a film and more books, with all proceeds going to fund hospitals, schools and more goodwill activities. Empowering and inspiring, *A Human Life* could change your life-and the lives of everyone on the planet.

Human Being @ Risk Mark Coeckelbergh,2013-02-15 Whereas standard approaches to risk and vulnerability presuppose a strict separation between humans and their world, this book develops an existential-phenomenological approach according to which we are always already beings-at-risk. Moreover, it is argued that in our struggle against vulnerability, we create new vulnerabilities and thereby transform ourselves as much as we transform the world. Responding

to the discussion about human enhancement and information technologies, the book then shows that this dynamic-relational approach has important implications for the evaluation of new technologies and their risks. It calls for a normative anthropology of vulnerability that does not ask which objective risks are acceptable, how we can become invulnerable, or which technologies threaten human nature, but which vulnerability transformations we want. To the extent that we can steer the growth of new technologies at all, this tragic and sometimes comic project should therefore be guided by what we want to become.

Beyond Fake News Justin P. McBrayer, 2020-09-22 The world is swimming in misinformation. Conflicting messages bombard us every day with news on everything from politics and world events to investments and alternative health. The daily paper, nightly news, websites, and social media each compete for our attention and each often insist on a different version of the facts. Inevitably, we have questions: Who is telling the truth? How would we know? How did we get here? What can we do? *Beyond Fake News* answers these and other queries. It offers a technological and market-based explanation for how our informational environment became so polluted. It shows how purveyors of news often have incentives to mislead us, and how consumers of information often have incentives to be misled. And it chronicles how, as technology improves and the regulatory burdens drop, our information-scape becomes ever more littered with misinformation. *Beyond Fake News* argues that even when we really want the truth, our minds are built in such a way so as to be incapable of grasping many facts, and blind spots mar our view of the world. But we can do better, both as individuals and as a society. As individuals, we can improve the accuracy of our understanding of the world by knowing who to trust and recognizing our limitations. And as a society, we can take important steps to reduce the quantity and effects of misinformation.
